6 **OUT AND ABOUT:** Wall & Deco's recently released line of exterior wallpapers take bold designs out of the house and into the yard. Made from fiberglass fabrics, the fade-resistant coverings have a series of coatings that protect them from heat, water and cracks. www.wallanddeco.com

7 **BRIGHT SPOT:** "I don't do red doors. I like them but they've been done. There aren't very many yellow front doors, but it's a great choice. It's bright and sunny and happy. To me this evokes the warmth and sun of Southern California." - landscape designer Chris Fenmore, Garden Studio Design (her choice: Benjamin Moore No. 357, Yellow Hibiscus).

9 **FLOWERS ON WHEELS:** Who says all discarded toys have to be banished from the garden? This Radio Flyer wagon makes for a one-of-a-kind-planter and only requires a few tools. Floral expert Debra Prinzing simply pierced a series of holes using a hammer and an awl for irrigation, then filled the wagon with 1 inch of dirt and loaded it up with daffodil bulbs. Three weeks later, voila! A mobile garden bed was born.
